Unified Grade	B1 (B1)		

Introduction

Capgemini supports you in your personal growth and aims for you to #GETTHEFUTUREYOUWANT.

You are engaging in continuous development activities and conversations with your People Manager and peers, aimed at providing you guidance and opportunities for you to progress.

This process is designed to capture all elements (priorities, feedback, development activities, aspirations and challenges) that you have been exchanging with your People Manager, in one simple form. At the end of this process, you and your People Manager can identify whether there should be any changes to priorities.

If you have any questions or concerns relating to this process, you can contact your People Manager, your HR Business Partner or easily obtain more information on the People Experience intranet.

Priorities

This section is for evaluating the individual priorities that you have agreed with your People Manager at the beginning of the year and that you kept up-to-date through regular Check-Ins throughout the year.

These priorities include achievements and contributions from your assignments. You are strongly encouraged to evidence progress and achievements against your development priorities. The balance between performing in business and constantly progressing is at the heart of what defines success at Capgemini.

Assignment

Overall Comments on Priorities

	Since joining Capgemini in June as a MuleSoft Developer, I have been actively contributing to the KCC project, which involves migrating services from MuleSoft to Node.js. I consistently submit my timecards before the deadline and maintain a high level of accountability.
Employee Comments	My key contributions include: - Actively analyzing and delivering knowledge transfers (KT) for complex MuleSoft code. - Debugging and resolving critical issues, including client-facing queries, with a focus on root cause analysis and long-term solutions. - Collaborating directly with clients to clarify requirements and ensure smooth issue resolution. - Mentoring four junior team members to help them understand MuleSoft architecture, coding standards, and best practices. - Conducting interviews for five A-grade MuleSoft candidates and providing constructive feedback to enhance their technical capabilities. In addition to my project responsibilities, I am committed to continuous learning. I am exploring advanced MuleSoft features such as AI integration and Anypoint Code Builder. I have successfully completed the Boomi Associate Integration Developer certification and am currently preparing for the MuleSoft Level 2 certification to further deepen my expertise.
People Manager Comments	Naushad is very responsible for every task that team has assigned to him, considering as troubleshooting a problem or working on an API.

Validation

	☒ I confirm I had a conversation with my Employee on their performance and development this year
People Manager Comments	Naushad is working well and has good knowledge on Mulesoft.

Final Reflections on the Year - Skills Maturity

Given your review of skills maturity, please answer the following two questions:

[Click here](#) for Assessment scale

What level of overall skills maturity is being demonstrated? Expert

What level of leadership skills maturity is being demonstrated? Proficient

We recommend that the Capgemini Leadership Vision should be considered as guidance to all People Managers when they assess the Leadership Skills Maturity of their Team Members. While some Team Members might be in roles where they are expected to lead others, some other Team Members might only be expected to lead themselves. Please refer to the Capgemini Leadership Vision as a guide for assessing Leadership Skills Maturity of your Team Members.

Overall Comments on Skills Maturity

Employee Comment: What is the level of contribution this year?

I joined Capgemini in June this year as a Mulesoft Developer and have made meaningful contributions across multiple areas:

- Project Contribution – KCC Migration: I actively contributed to the MuleSoft-to-Node.js migration project (KCC), focusing on complex code analysis and architectural understanding of APIs. My efforts helped simplify and clarify logic for the Node.js team, improving cross-functional collaboration.

- Technical Growth & Implementation: Through this project, I gained hands-on experience with new connectors and implementation strategies. I also deepened my understanding of project leadership and delivery practices.

- Team Enablement & Mentorship: I've been mentoring junior developers in MuleSoft, helping them understand code structures and best practices. I've also resolved critical queries raised by the Node.js team, ensuring smooth integration and timely issue resolution.

- Interviewing & Talent Development: I participated in the interview process for Grade A candidates, providing constructive feedback to support hiring decisions and candidate development.

- Continuous Learning & Certification: I am actively upskilling in MuleSoft, including exploring AI integrations and Anypoint Code Builder. I successfully completed the Boomi Associate Integration Developer certification and am currently preparing for the MuleSoft Certified Developer Level 2 certification via Udemy.

Overall, I've demonstrated strong technical ownership, proactive learning, and collaborative spirit, contributing to both project success and team development.

Over the past few months, I have demonstrated a clear progression from foundational to intermediate leadership maturity. My contributions reflect a growing ability to lead with initiative, accountability, and technical depth.

Since joining Capgemini in June as a MuleSoft Developer, I have taken on responsibilities that extend beyond individual delivery, including mentoring, and talent evaluation. These experiences have strengthened my leadership capabilities in the following areas:

Leadership & Team Development

- Mentored four junior team members, guiding them through MuleSoft architecture, coding standards, and best practices.
- Conducted interviews for five Grade A MuleSoft candidates, providing detailed feedback to support hiring decisions and skill development.
- Facilitated knowledge transfers (KT) for complex MuleSoft code, helping cross-functional teams understand logic and architecture during the MuleSoft-to-Node.js migration (KCC project).

Employee Comment: What level of leadership skills maturity is being demonstrated?

Technical Ownership & Client Collaboration

- Led root cause analysis and resolution of critical issues, including client-facing queries, ensuring long-term stability and client satisfaction.
- Collaborated directly with clients to clarify requirements and streamline issue resolution, demonstrating strong communication.

Professional Growth & Learning Agility

- Completed certifications including Boomi Associate Integration Developer.

- Proactively upskilled in Agile methodologies, generative AI, Boomi & other technology to stay aligned with evolving industry trends.
- Currently preparing for MuleSoft Certified Developer Level 2, while exploring advanced features such as AI integration and Anypoint Code Builder.

Operational Discipline

- Consistently submitted timecards ahead of deadlines and maintained a high level of personal accountability.

Overall, I have shown a strong commitment to continuous improvement, technical excellence, and collaborative leadership—laying a solid foundation for future growth into advanced leadership roles.

People Manager Comments

- 1) Ali is very sharp and Agile in terms of learning new things. Very hard-working resource in the team, who is very reliable.
- 2) He performs all the tasks with alacrity and with a motto to learn and most importantly, He tries to dig down into the subject matter and gives us more information

Final Reflections - In Year Contribution

Given your review of contribution this year, please answer the following question:

What is the Overall level of contribution this year?

Succeeding

Overall Comments on In Year Contribution

Since joining Capgemini in June as a MuleSoft Developer, I have made impactful contributions across technical delivery, team development, and personal growth. My work on the KCC project—focused on migrating services from MuleSoft to Node.js—has allowed me to demonstrate strong ownership, cross-functional collaboration, and leadership maturity.

Project Delivery & Technical Ownership

- Contributed to the MuleSoft-to-Node.js migration by analyzing complex MuleSoft code and delivering clear knowledge transfers (KT) to support the Node.js team.
- Resolved critical issues, including client-facing queries, through root cause analysis and long-term solutions.
- Collaborated directly with clients to clarify requirements and ensure smooth issue resolution.

Leadership & Team Development

- Mentored four junior team members, helping them understand MuleSoft architecture, coding standards, and best practices.
- Conducted interviews for five Grade A MuleSoft candidates, providing detailed feedback to support hiring decisions and technical growth.
- Facilitated KT sessions to bridge understanding across teams and improve delivery efficiency.

Employee Comments

Learning Agility & Certification

- Completed the Boomi Associate Integration Developer certification.
- Proactively upskilled in Agile methodologies, generative AI, Boomi & other technology to stay aligned with evolving technology trends.
- Currently preparing for the MuleSoft Certified Developer Level 2 certification, while exploring advanced MuleSoft features such as AI integration and Anypoint Code Builder.

Operational Excellence

- Maintained consistent discipline in operational tasks, including timely submission of timecards and adherence to delivery timelines.

Overall, I believe my skills have matured significantly, allowing me to contribute more effectively to our team's objectives and prepare for future challenges. I am eager to continue this trajectory of growth and leverage my expanding skill set to drive even greater success for our team.
